

Creative Homework – Spring 2026

This term, our enquiry question is: *“Why is water movement significant?”*

We'd love for you to continue your learning at home and have a go at some of the suggested activities below! Or, if you have your own creative idea to enhance your learning about water movement, we'd love to see what you get up to. Please bring it into school or send it on Dojo to your teacher.

Produce a fact file about one of the world's rivers. Include as many interesting facts as you can.

Rivers and oceans are being damaged by pollution. Can you create a sculpture using plastic waste to show the impact of pollution on our waterways?

Research and make a PowerPoint or poster all about rivers. A fact file based on a famous river? The water cycle? Animals that live in and around rivers?

Design and make a 3D model of a river, from source to mouth. Can you label it with its different features too? Be creative and think about what you could use!

Write a poem about a river or river creature. It could be a shape poem or a kenning.

Draw or paint a picture of a river scene. You could use water colours or try a different style of painting

Can you make a creative quiz about rivers that you can do at home with your family and with your classmates in school?

Rivers, lakes and even the sea are amazing! But they can also be very dangerous. Can you make a poster or leaflet advising people about how to stay safe around water?

Write a creative story with a water theme, maybe a river or sea monster that comes to life? Use your imagination.
